Abstract (en)

[origin: EP2634987A1] The present disclosure applies to the field of software, and provides a method, a device and a system for downloading games. The method includes that: after a user logs in, a client device sends a version number of a local game hall and personal information of the user to a server, which generates and returns a silent configuration file for downloading according to the version number of the local game hall and personal information of the user, wherein the silent configuration file for downloading includes a list of games that needs to be updated and/or downloaded and a silent download speed-limiting mode; the client device receives the silent configuration file for downloading returned by the server, and silently downloads and/or updates corresponding games of the local game hall according to the silent configuration file for downloading. An embodiment of the present disclosure can set the most appropriate silent download mode according to network conditions and user requirements.
