Abstract (en)
A card member (11) includes: a substrate (12) having a card edge portion (14) on which plural card edge terminals (13) connected with a counterpart connector (31) are formed on at least one side; and a covering member (15) that covers the substrate (12), the covering member (15) having an accommodating portion (18) in which the substrate (12) is accommodated and openings (26) to expose at least the card edge terminals (13), and the accommodating portion (18) being filled with filler. In a card edge connector (10), the card member (11) and a counterpart connector (31) are connected. With these configurations, a card member and a card edge connector with an excellent waterproof effect can be provided.
