Abstract (en)

[origin: WO2012060708A1] Curtain draw back system for an emergency exit (30) comprising at least one exit element (32) that can be opened in case of an emergency, wherein the curtain draw back system (1) comprises a rail (10) configured to displaceably hold a covering (28) such as a curtain, wherein the curtain draw back system (1) comprises a draw back assembly (2) coupled to the rail, which draw back assembly is configured to withdraw the covering along the rail in dependence of a withdraw signal such that the at least one exit element will be freely accessible. The invention further relates to an assembly comprising an emergency exit and a curtain draw back system and to a method to adapt a curtain rail into a curtain draw back system.
