Abstract (en)

[origin: WO2012059397A1] The present invention relates to a cleaning device for removing impregnating agent residues from a workpiece (12) using a cleaning fluid (14), with a supply device (16) for supplying the cleaning fluid (14) to the workpiece (12), a receiving space (18) for receiving the workpiece (12) during the cleaning operation, and a gravity separator (20) for separating the impregnating agent residues, which have been removed from the workpiece (12), from the cleaning fluid (14), wherein the gravity separator (20) is arranged below the receiving space (18) for the workpiece (12) in the direction of gravity.
