Abstract (en)

[origin: WO2012059424A1] The invention relates to an antitheft device (2) for a vehicle steering column, including a lock comprising a rotor (14) and a stator (12), one of which has a pin (24) and the other of which has a groove (46) for receiving the pin and shaped such that, from a predetermined angular position, a rotation of the rotor with respect to the stator in a predetermined direction requires a preliminary pressing of the rotor with respect to the stator in the direction of the inside of the device.
