Abstract (en)  
[origin: WO2012061701A1] User input is received, specifying a continuous traced path across a keyboard presented on a touch sensitive display. An input sequence is resolved. Including traced keys and auxiliary keys proximate to the traced keys by prescribed criteria. For each of one or more candidate entries of a prescribed vocabulary, a set-edit-dlstance metric is computed between said input sequence and the candidate entry. Various rules specify when penalties are imposed, or not, in computing the set-edit-distance metric. Candidate entries are ranked and displayed according to the computed metric.
