Abstract (en)
[origin: EP2636339A1] The extendable element has a storage compartment (5) made of chromium steel, two longitudinal guides (3,4), and two longitudinal profiles (6,7) which are movably connected with the storage compartment, such that the compartment of cupboard element (2) is extended and inserted. Between each of the second longitudinal profile and the compartment, at least one adapter element (9) is provided with a holder (10) through which the adapter element can be fixed to the second longitudinal profile. A connector (11) is provided for connecting adapter element and compartment with each other.
