Abstract (en)

[origin: EP2636780A1] The bar has a body (2) provided in a longitudinal direction (3) and an effective tool holder (4) comprising strips (5) and grooves (6) alternative in the longitudinal direction. The strips are formed by metal slats (7), which comprises a broad side (8) and a narrow side (9) limiting the grooves. The slats are connected with the body in a region of the narrow side. The slats are adhered with the body at the narrow side. The slats are embedded in the region of the narrow side in a connection mass (10). The connection mass is adhered at the body. An independent claim is also included for a method for manufacturing an effect tool bar.
