Abstract (en)

[origin: EP2636790A1] The appliance has a steam generating base (1) and a laundry iron (3) connected with each other by a cord (2). The base has a water tank and a storage cavity of the cord, where the cavity is extended transversely to the base. The cavity has an access opening (15A) on a side of the base. The tank has an external wall defined by a tank part (14) made of plastic material obtained by molding. The tank part integrates the cavity. The cavity has a wall made of translucent/transparent material to offer a visual access on a water level in the tank. The cavity opens on two sides of the base.
