Abstract (en)

[origin: EP2636793A2] Metalled road with a road direction and constructed from road covering slabs (2,3) following one another in the road direction and plastic profiles (4) lying between consecutive road covering slabs, wherein the two consecutive road covering slabs are provided on their opposite-lying ends with a respective groove (7), and wherein the plastic profile extends into the respective grooves to form a tongue-and-groove-shaped joint, said joint linking two consecutive road covering slabs to form the metalled road.
