Abstract (en)

[origin: EP2636811A1] The invention regards a connection system for multilayer panes, wherein the connection system provides a waterproof connection, and a structural connection, wherein there is no structural element present external to the planes defined by the in- and outsides of the multilayer panes. The connection system may, for example, be used with multilayer panes with 2 or 3 glass plates. Preferably, the connection system comprises a profile that contributes to the mechanical integrity of the multilayer pane.
