Abstract (en)
[origin: EP2636839A2] The shutter box (1) has a side space (3) and an outer side (4), where an upper side of the box is assigned to a building ceiling and a window or door frame by passing the box through a metallic static part (6) connected to a housing cover. The static part includes a top part (7) and a bottom part (8) detachably connected in a vertical direction. The top part includes a vertical portion (11) aligned in terms of area in a transverse direction of the shutter box, where the top part and the bottom part have a parallel bottom or top section.
