Abstract (en)

The support (1) has an installation stamper (2) that is in connection with a coupling element (10) by a telescopic type supporting device. The supporting device is arranged on the installation stamper at a distance from upper- and lower ends (2a, 2b) of the installation stamper. The supporting device is designed as a supporting arm (20) and comprises inner- and outer telescopic links (21, 22), which are movable relative to each other and lockable together in different positions. The coupling element comprises a link assembly (31) that is in connection with a rifle housing (30).
