Abstract (en)

[origin: US2012123459A1] A single-use safety lancet having a housing, a triggering mechanism, and at least one grip. The housing contains a drive system and includes a proximal end and a distal end. The triggering mechanism is coupled to the proximal end of the housing and is operable to activate a lancet stroke. The at least one grip extends from the housing and is operable to permit user interaction therewith.
