Abstract (en)

[origin: WO2012063236A1] A method and system for non-invasive cosmetic treatment of a soft tissue, such as adipose tissue, muscle tissue or connective tissue. The apparatus comprises an applicator configured to apply a positive pressure phase to the skin surface and a negative pressure phase with respect to ambient pressure. The positive pressure phase is substantially longer than the negative pressure phase and the negative pressure phase follows immediately the positive pressure phase.
