Abstract (en)
[origin: WO2012062517A1] A method for a parking process in a parking space for a motor vehicle having at least one sensor, wherein when the vehicle drives past data for detecting a parking space are continuously collected using the said at least one sensor and when a parking space in which the vehicle can be parked is detected a control unit decides automatically which parking space is selected for a possible parking process on the basis of the calculated trajectory.
