Abstract (en)

[origin: WO2012034156A1] The invention relates to rectangular formwork element (1), comprising a planar main body (3), which is bounded by an edge face (8) and which forms two plate surfaces (5, 6) and which is made of wood and/or wood material and/or wood-plastic composite, and a protective edge (4), which is arranged on the edge face (8) and which is made of plastic, wherein first protective edge sections (10) along the rectangle edges (9) are substantially flush with the plate surface (5, 6) of the main body (3). Second protective edge sections (12) of the protective edge (4), on the corner sections (11) of the formwork element (1), each have an elevated section (14) that is raised relative to the plate surface (5, 6) of the main body (3), in particular by at least 0.5 mm.
