Abstract (en)

[origin: WO2012062485A1] The invention relates to a device (1) for recording and playing back one or more stories read by a reader, corresponding to one or more pages of a book, said device comprising: one or more removable fixing elements (10) for fixing said device (1) in a removable manner to said book during the reading of the story or plurality of stories, a microphone (M) arranged to record the story or plurality of stories and to create a corresponding audio-digital file, a digital memory for storing said audio-digital file, a loudspeaker (H) for playing back an audio signal corresponding to said audio-digital file depending on a selection by a user of haptic control members (20; 30; V; O; R; 40; 42; 44), a microcontroller running a computer program controlling said device (1), said haptic control members (20; 30; V; O; R; 40; 42; 44) comprising a pagination button (O) that allows said reader to introduce pagination marks into said audio-digital file.
