Abstract (en)
[origin: WO2012062398A2] The invention relates to an electrical switch cabinet for use in the low voltage range with voltages up to 500 V and electric currents up to 63 A, wherein said switch cabinet is constructed as a wall hung cabinet for surface or recessed mounting or as a standing cabinet, from a rear wall and side wall parts (12, 14) connected thereto and also, optionally, at least one movable front door, and is provided with internal fittings for the connection of switching devices arranged in the switch cabinet. The side wall parts (12, 14) and the rear wall are modularly configured and rigidly connected to one another, and the at least one movable front door, which is optionally provided, is guided in grooves or by means of straps. The invention further relates to a method for producing the relevant electrical switch cabinet.
