Abstract (en)

[origin: EP2639025A1] The present invention belongs to the field of processes for the elimination of the haloanisoles and halophenols present in cork as well as of the installations used to carry out said elimination, where the process for the elimination of halogenated compounds derived from anisole and phenol present in cork is based on the thermal desorption in gaseous state of said compounds of the cork by the application of vacuum as well as the installation where said process is performed.
