Abstract (en)

[origin: EP2639179A1] The cap (100) has an originality securing strip (114) connected to a lower side of the cap, where the cap is made from plastic. The strip has a cam-like projection (118) that grips a collar of a container. The strip has a recess (130) at a circumferential-side, where the projection is partially guided through the recess during closing of the container. The strip has an additional projection that extends in a longitudinal direction of the cap. The recess comprises two opening sections that are connected with one another, where a wall area of the strip is arranged between the opening sections.
