Abstract (en)
[origin: EP2639359A1] Dredging equipment (1) which comprises a vessel (2), a pumping line and one or more suspension-wire systems (39, 54) on the vessel (2) which are linked to the pumping line (8) wherein the pumping line (8) is an articulated pumping line with two or more pumping line sections, which can be folded into a reduced status in which at least some of the pumping line sections (28, 32,33) are brought parallel and near to one another over a substantial part of their length, which can be unfolded into an extended status and be brought in the submerged position for use of the pumping means (7).
