Abstract (en)

[origin: WO2012068531A2] Methods and compositions for improving the delivery and/or efficacy of cancer therapeutics are disclosed. Methods and compositions for treating or preventing a cancer (e.g., a solid tumor such as a desmoplastic tumor) by administering to a subject an antihypertensive agent, as a single agent or combination with a cancer therapeutic agent (for example, a therapeutic agent ranging in size from a large nanotherapeutic to a low molecular weight chemotherapeutics and/or oxygen radical) are disclosed.
