Abstract (en)

[origin: WO2012066362A1] A method and apparatus for repairing a road are disclosed. The apparatus includes an air flow speed adjustment device that allows the air speed to be adjusted in response to the addition of aggregate or bitumen into the airstream. The eductor is also provided with a uniform cross-section to reduce the noise and wear on the components. The disclosed road repairing apparatus is very efficient and is able to run using the vehicle engine without being over powered for either running the vehicle or the repair apparatus.
