Abstract (en)
[origin: WO2012065676A1] The invention relates to an exhaust gas system (10) of an internal combustion engine, in particular for a vehicle, having an exhaust gas conveying duct (12), at least one insert (14) disposed in the exhaust gas conveying duct (12) for purifying the exhaust gas, an injection system (18) disposed upstream of the insert (14) in the flow path and a turbuliser (20) disposed between the injection system (18) and the insert (14), wherein a flow rectifier (22) is provided in the exhaust gas conveying duct (12) between the turbuliser (20) and the insert (14).
