Abstract (en)

[origin: WO2012065763A2] The invention relates to a cover device (100) for a spark plug shaft (200) in an internal combustion engine (10), in particular a stationary large gas engine, characterised in that securing means (110) are provided for mechanically securing the cover device (100) to a target system (300) and that the securing means (110) are in addition designed to electrically connect at least one electric conductor (511) to the cover device (100) and/or the target system (300).
