Abstract (en)

[origin: WO2013114162A1] One or more embodiments of a method and apparatus taught herein provide an electronic display projection assembly (10) that comprises an electronic display (12) configured to display an image, and a transparent glass layer (14) positioned on one side of the electronic display (12) on which the image is displayed. A projection layer (17) is located on a surface of the glass layer. A projecting layer (16) is positioned between the electronic display (12) and the glass layer (14), and comprise a plurality of microlenses for projecting the displayed image onto the projection layer. The projecting and projection layers may be located on either opposing sides of the transparent glass layer, or on the same side beneath the glass layer. A corresponding method of providing an image from an electronic display is also disclosed.
