Abstract (en)  
The present invention relates to a washing machine (10), the machine (10) including a washing tub (13) and at least one control system with a user interface (12), a compartment (23) being fluidly connected to the tub via an outlet, and a detergent container (11) with at least one tray (14, 15, 16) being located in the compartment (23). The compartment comprises a main water duct system (17) being arranged to provide water to the tray/s (14, 15, 16) in order to mix the detergent in the tray/s with water and at least one drainage passage (34) arranged to guide the water-mixed detergent via the compartment (23) to the outlet (32). The compartment is particularly characterized in that it further comprises at least one additional water duct system (18, 19) being arranged to provide water beside the container directly into to the compartment (23) in order to flush out residues in the compartment (23) to the outlet (32).
