Abstract (en)  
The invention relates to a vented laundry dryer which comprises a casing supporting a revolving drum and having a basement, and an air circulation system, the air circulation system including an inlet duct to intake air from the outside to the drum and a exhaust tube to exhaust the air from the drum to the outside. The exhaust tube is realized in correspondence of the basement and includes a connecting device apt to connect said exhaust tube to an external exhaust tube. The connecting device is realized integral to the exhaust tube.
