Abstract (en)
The system (10) has a panel (40) that is intended to receive a posting. A carrying structure (20) is utilized for supporting the panel. The carrying structure includes a module formed by a framework provided with an upright. The panel and a ballasting base (50) are put back on the upright. The ballasting base is intended to receive the framework and is ready to be posed on the ground. The carrying structure is placed behind the panel that supports the structure. The ballasting base is arranged to be moved by rotation.

Abstract (fr)
L'invention concerne un système de clôture (10) comprenant au moins un panneau (40) destiné à recevoir un affichage, une structure porteuse (20) supportant ledit panneau (40), cette structure porteuse (20) comprenant au moins un module formé par une ossature munie d'au moins un montant (31) sur lequel repose ledit panneau (40) et un socle de lestage (50), destiné à recevoir l'ossature, apte à être posé sur le sol, la structure porteuse (20) étant ménagée en arrière du panneau (40) qu'elle supporte, le système de clôture (10) étant caractérisé en ce que le socle (50) est configuré pour être déplacé par par roulement.
