Abstract (en)

[origin: EP2642209A1] The device (4) has a sub-segment (6) that is held slidably relative to a sub-segment (5). A support and guide element (7) is connected with the sub-segments. An energy accumulator (8) is installed in the sub-segment (6) and varied to adjust force in installation position. The energy accumulator is provided with a gas spring (9) and/or a helical spring. The energy accumulator is fixable in different angular positions to the support and guide element.
