Abstract (en)

[origin: EP2642753A1] A transmission terminal (10) receives image data from one or more counterpart transmission terminals (10) via a relay device (30), and displays one or more images based on the received image data on a display (120). When the transmission terminal (10) receives message data from a management system (50) in alternative to image data to be transmitted from one of the one or more counterpart transmission terminals (10), the transmission terminal (10) displays a message on the display (120) based on the received message data.
