Abstract (en)
[origin: WO2012068595A1] Disclosed is a receptacle rail (1) comprising a double-walled drawer side wall (5) which is to be arranged on the receptacle rail and which has an inner wall (5a) and an outer wall (5b). One respective upward-extending attachment (2, 3) is arranged in the front end region and the rear end region of the receptacle rail (1). Fastening devices that are to be connected to a front cover of the drawer and to a rear wall of the drawer can be mounted on the attachments (2, 3). An elongate stabilizing device (4) which is connected to the two attachments (2, 3) and lies at least partially above the receptacle rail (1) is provided inside the double-walled drawer side wall (5), in the top region thereof.
