Abstract (en)

[origin: WO2012069148A2] The invention relates to a device and to a corresponding method for practicing the golf swing with a guide (10) along which a golf club can be guided on a specified path. In order to allow the specification of a golf club path without unnecessarily limiting the freedom of movement of the golf player, the guide (10) has at least one subsection (15) which lies in the specified path in a first position and deviates from the specified path in a second position. Furthermore, a device (16, 17) is provided which can bring the subsection (15) from the first position into the second position.
