Abstract (en)
[origin: WO2012069707A1] The invention relates to a reflective system (100) comprising: - a base (101) intended to be mounted in a rotatable manner about a rotational axis (D), - at least two reflective elements (104) mounted on said base (101), each extending over an angular sector and having the form of a portion of a cone, the axis of which coincides with said rotational axis (D), and at least two of the plurality of reflective elements (104) have different apex half-angles (?).
