Abstract (en)

[origin: WO2012079780A1] The invention relates to a comminution apparatus (1) for foodstuffs, which has a cutting part (2) and an operating part (3), which is mounted such that it can pivot, for pushing material to be comminuted through the cutting part (2), having a cover part (4) for fitting to an accommodation container (5) for comminuted material, wherein the cover part (4) has an opening (6) with a passage for comminuted material. The pivoting bearing (7) for the operating part is arranged above the upper face of the cover part (4).
