Abstract (en)  
[origin: WO2012069598A1] The present invention relates to a container arrangement having a first container part (2), with a removal opening (8), and a second container part (3), with a removal opening (9). The first container part (2) and the second container part (3) here can be connected to one another such that the removal opening (8) of the first container part (2) is oriented in a first direction and the removal opening (9) of the second container part (3) is oriented in a second direction.
