Abstract (en)

[origin: WO2012069648A1] The invention relates to a home appliance, in particular a washing machine (1) or a dryer, with a housing (3), in which a drum (11) is rotatably mounted in a tub (13), the tub (13) being coupled to the housing (3) via at least one support element (31) of a vibration damping device (17, 31, 33). According to the invention, the support element (31) is articulated to the housing (3) via a pivot lever (33) which is articulated to the housing (3), particularly to a housing side (35), via a first pivot articulation (37) about a first pivot axis (39) fixed with respect to the housing (3).
