Abstract (en)
[origin: WO2012069439A2] The invention relates to a refrigerator which comprises a cabinet (2) having a first storage compartment (4), a second storage compartment (5, 5', 5'') under the first storage compartment (4) and a thermally insulative separation wall (6) configured for separating the first and second storage compartments (4, 5, 5', 5'') from each other, and a first door (3a) and a second door (3b) hinged to the left side and the right side of the cabinet (2) respectively for closing and opening the first storage compartment (4). According to the disclosure, the second storage compartment (5, 5', 5'') is also closed or opened by means of the first door (3a) and/or the second door (3b).
