Abstract (en)

[origin: WO2012069183A1] The invention relates to a method for displaying a graphical user interface of a portable computation unit (20) on an external display unit (40) which has a native resolution and a native aspect ratio, with the following steps being carried out: - emulation of an operating system of the portable computation unit (20) on an external computation unit (60) in an emulation (70); - input of user inputs (80) into the portable computation unit (20); - transmission of the user inputs (80) to the emulation (70); - interpretation of the user inputs (80) in the emulation (70); - production of an emulated user interface (55) of the portable computation unit (20); - transmission of the emulated user interface (55) in the form of graphics data (50) to the external display unit (50); display of the emulated user interface (55) on the external display unit (40). The invention also relates to an apparatus for displaying a graphical user interface of a portable computation unit (20) on an external display unit (40).
