Abstract (en)
Two edge cut portions extending in parallel with a take-out direction are provided in the vicinity of a side of the lower plate where the right flap is provided. The weight scale is taken out by placing the package with a take-out side faced upward, pulling out the tongue strips, opening the right side plate and the right flap, and bending the lower plate along the bending line. An assembled state is illustrated in Fig. 3. Fig. 3 is a bottom view of the package with the right side surface facing the far side of the drawing.
