Abstract (en)
The system has instep clamps (3) anchored in a concrete sleeper (10) and frictionally connected with an angular guiding plate (4) and a foot of a rail (9) through a WD bolt (5), which is passed through the guiding plate. The rail is laterally arranged and partially embedded in the guiding plate. A concrete anchor (8) is embedded in the concrete sleeper. The bolt is inserted in a supporting ring (6) and connected with the concrete anchor. The supporting ring and the concrete anchor are concreted in the concrete sleeper. The bolt is designed as a threaded bolt.

Abstract (de)
Die Erfindung beschreibt ein Schienenbefestigungssystem für Schienen auf Betonschwellen, wobei Stützringe und Betonanker in die Betonschwelle einbetoniert sind.
