Abstract (en)
[origin: EP2644776A1] The protection wall (1) has a pair of protective wall elements (2) which are detachably connected with each other. One or more of the land end side faces are formed at the front side of the wall elements and are connected between the wall elements in form-fitting manner. The end side faces of wall elements are connected to pressure elements such as plates which are contacted with each other. A barrier is formed between pressure elements and wall elements. A filling material made of concrete, plastic, elastomer, wood or composite of specified materials is provided.
