Abstract (en)

[origin: EP2644794A2] The system has formwork block modules (2) whose side walls (4) are connected to each other via transverse webs (6). Several cavities are formed and dimensioned, and several vertical shafts and horizontal shafts are arranged in between which several pipelines are inserted for providing water sanitation, for applying heating, and for providing electrical installation. The objects having diameter of about 5-10 cm are accommodated in the dimensioned cavities. The internal height of horizontal shaft is about 20 cm. An independent claim is included for a method for constructing building by using formwork block system.
