Abstract (en)  
[origin: EP2644810A2] The door-stopper (1) has a rubber-elastic body with high friction coefficient, and a semicircle body including an upper part (h 8.1) and a lower part (h 8.2). A hole (5) is formed with two upwardly directed attachment openings (6, 7) on the upper part for attaching to a door handle or a door pawl or a hinge. The hole is provided with hiding borders made of plastic. The hole and the attachment openings are provided at a left side or right side of the upper part, where width of the door-stopper is 5 cm.
