Abstract (en)
[origin: EP2644812A2] A glazing system or equivalent which has at least one guide rail (1) for a panel element/panel elements (9) and at least one panel element (9), adjustable to a guide rail, comprising a plane element (91) attached to a profile (92), and attachable via the profile to at least one, preferably two rollers (3) adjustable to a guide rail (1) comprising two sides (1 a, 1 b), connected by the base (1 c) of the rail, whereupon the inner surface of one side of the guide rail has a guide groove (6) attached to it or has been formed into a guide groove (6) longitudinal to the rail (1), whereupon the horizontal roller (3) of the guide rail may be adjusted to the guide groove (6) so that the roller (3) may be slid or rolled along said groove (6). The guide groove (6) on the first side (1 a, 1b) of the guide rail is considerably wider than the wheel (3a) of the roller (3) moving in said groove in the vertical direction of the side and the other side (1a, 1b) of the guide rail (1) has at least one seal groove (4) so that the seal/seals (40) installed into the seal groove/seal grooves (4) support the roller (3) when it is in contact with the guide groove (6).
