Abstract (en)
[origin: EP2644984A1] The lamp has a transparent cover (2) that is connected with a side wall (8) of bulb housing, in order to close the housing. Hooks (4) of transparent cover are cooperated with closure elements (6) at the housing. A spring element (14) of the housing-side closure elements is extended from the side wall of the housing in a direction towards the interior of housing. The spring element is cooperated with the hook, in order to hold the transparent cover at the housing.
