Abstract (en)
[origin: EP2645003A1] The support (10) has a receiving region (12) for receiving food, and a holding region (14) laterally arranged in an insertion direction. The holding region engages with a cooking product support receiver and includes a molding part (20) i.e. drawer stopper, with a set of flat edges having pressure angles, where one of the edges having one of the pressure angles engages with the cooking product support receiver. The molding part is downwardly directed in a cooking position. The edge turns toward a cooking chamber rear wall, and another edge turns away from the cooking space rear wall.
