Abstract (en)

The present invention relates to a cooling device, particularly a domestic refrigerator, having a heat-insulated body (10); a drawer (20) disposed into the body (10) in a movable manner; and grooves (22) formed on a base (21) provided at the drawer (20) between mutual walls (23, 24; 25, 26). As an improvement, the subject matter invention comprises at least one inner box (30) which rests by being guided on the grooves (22) of the drawer (20) so as to separate the drawer (20) into at least two chambers.
