Abstract (en)

[origin: EP2645048A2] The device (1) has positioning unit (3) such as industrial robot for moving the flying target (2). The control unit (4) is connected to the positioning unit. The control unit is arranged to move and locate the flying target on the positioning unit during a flight of the flying target. The container is provided with an opening through which the flying target is locked. An independent claim is included for method for simulating flying target of active system.
